Subject: Please Revise your 1,3-D plan
Date: Wednesday, January 18, 2023 4:42:00 PM

EXTERNAL:

Dear officers of DPR

DPR's plan would allow for 14 times more cancer-causing 1,3-D in the air than our State scientists at OEHHA say is safe. Our communities are not worth 14 times less than non-ag communities.

DPR must revise its plan to regulate 1,3-D.

To protect public health, DPR must follow the state toxicologists' (OEHHA's) scientifically derived safe harbor level.

Application cap allowances need to be reduced/strengthened not eliminated.

Farmworkers who work in neighboring or nearby fumigated fields need protections in this rule and must be included in its revision.

In solidarity,

David Kong - Greenfield Resident
