EXTERNAL:

How can you expose all of this horrible chemical to all of us. You are responsible for protecting us and you are not doing your job!

Strawberry fields are all around me and right next to Elkhorn School in Monterey County where they spray this horrible, life threatening chemical. I see the runoff into the storm drains and I would be money this is going straight to Elkhorn Slough as well.

Many other countries have banned this chemical, time for California to step up. Do something! Protect us!! Thank you, Donna
