pesticide1,3-D You must provide better regulations for this pesticide. In our town of Aromas we are now surrounded by fields of strawberries which are covered by plastic and are being sprayed. Some of the farmers did not even have a permit to spray until we turned them in to the Dept. of Agriculture in San Benito Co.. The fields are very close to our school and homes. How unethical you are to allow this to happen. We are ingesting plastic as well I call it Plastic & Pesticide Valley instead of Pajaro Valley. How beautiful it was when just lettuce and apple orchards. Please think of the health of all of our children Karen Mendonca, Aromas, Calif.
