Subject: Regarding failure to recognize or understand the seriousness of the scientific evidence or statistical incidence of cancers and serious disability caused by exposure to TELONE
Date: Thursday, May 25, 2023 4:53:41 PM

EXTERNAL:

Is it ignorance or willfulness or fear of losing your comfortable jobs that blinds you to the realities of the OEHHHA well- documented recommendations to reduce the use of and exposure to the public and children and farmworkers specifically??

May I recommend a visit to the pediatric cancer ward in Sacramento hospitals and a chat with the physicians and surgeons and families who care for seriously ill babies and children who have documented exposures to the numerous harmful agricultural Pesticides that created such suffering and deaths.
