EXTERNAL:

The DPR's proposal farmworker communities (farmworker/ indigenous)populations to be exposed 14 times more to 1,3D than OEHHA warns is safe. This is a cancer causing toxic air contaminant banned in 34 countries that drifts mile at harmful levels. This the 3rd most used pesticide in the Monterey and Santa Cruz Counties region. Stop the environmentally racist regulation of 1,3-D by DPR.

When OEHHA found the lifetime cancer risk 1,3-D air concentration to be 0.04 parts per billion, DPR totally ignored their findings. Withdraw DPR's current racist proposal NOW! This awful regulation by DPR IS ENVIRONMENTAL RACISM and an ENVIRONMENTAL INJUSTICE TO OUR FARMWORKING COMMUNITIES. I have personally been affected. My 28 year old nephew, my eldest sister and a friend are all battling cancer. This has to stop now!

IN SOLIDARITY,

Olga Reyna

United Farmworkers Monterey County
