EXTERNAL:

The central Valley and all its surrounding counties like Madera, Tulare, Kings and Kern have the worst air in the nation. Add to this the incredibly dangerous amounts of Telone that have been registered in the Fresno areas more specifically Parlier Ca.

Our workers and families are exposed to these fumigants 24 hours a day as they work and live in the areas where the fumigant is applied. The scientists have given their recommendations and we are not in agreements with Dow Chemical's preferred risk levels.

Communities, pregnant moms, unborn fetuses and children who live and breathe in these communities are at severe risk for Cancer.

I ask you to please listen to the many organizations that have signed urging you to protect our most vulnerable communities and our children.
