Subject: Pesticides in our water
Date: Tuesday, May 30, 2023 4:06:05 PM

EXTERNAL:

To me it seems criminal that one of our greatest resources, our water is becoming unsafe for consumption because of pesticides.

Must it take the problem becoming atrocious, as when birds eggs could not survive a parent sitting on the eggs for the problem to be dealt with.

Much better to address the problem now.

Thank you for your thoughtful consideration of this problem and our planet's future.
