

Table 8: *The reported cumulative acres treated with pesticides that are listed by U.S. EPA as A or B carcinogens or on the State’s Proposition 65 list of chemicals that are “known to cause cancer.” Use includes primarily agricultural applications (Most non-production-agricultural pesticide use reports are not required to report acreage. A zero indicates some non-agricultural use occurred, but acreage was not reported. The word ”none” indicates no use at all that year). The grand total for acres treated may be less than the sum of acres treated for all active ingredients because some products contain more than one active ingredient. Data are available at <ftp://transfer.cdpr.ca.gov/pub/outgoing/pur/data/ >.*
